My hobby

My hobby is collecting sea-shells. I have many colourful shells in my collection. I find them near the sea. I like the striped ones best. I have many books on shells.

Our solar system

There are eight planets in our solar system. They are, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune. The Sun is our Star.

All the planets of our solar system rotate around our sun. The most beautiful planet of our solar system is Saturn. Saturn has beautiful rings around it. The biggest planet of our solar system is

Jupiter. The smallest is Mercury. It is the closest planet to the Sun. Neptune is the furthest planet away from the Sun.

Most of the planets have got moons rotating around them. Our planet has got only one moon. But other planets have a number of moons.

We gather evidence about our solar system with the help of

satellites. Developed countries like America and Russia have sent a number of space shuttles to explore the solar system. Earth is the only planet that has scientific evidence of life. In future, we would be able to travel to other planets.

My little sister

I love you my Akki
I love you
I love you my Nangi
I love you

you don't cry Nangi
Akki is with you
you don't worry Akki
Nangi is with you

Are you telling the truth Akki
I am loving you
Why should I tell lies Nangi
I will never do that

Then I kiss you my Akki
Then I kiss you my Nangi
We are the best friends of all

A visit to the library with my little sister

I went to the library with my little sister. When we entered the library she kept talking and talking. I had to tell her not to talk because we have to maintain silence in the library. But when we went into the children's library and she saw the other children so busy taking books, she also kept quiet.

She had chosen many books and didn't know which four books to take. Then my mother gave her four proper books. After

that she sat on the cushion and saw the pictures in some books.

One uncle in the library put a cartoon on the TV. So she gave all the books to me and ran to see it. Then my father told me it's time to go. So we took the books and went home.

Beggars

In Colombo I see many beggars. They have no place to live and no one to help them. Beggars wear ragged and tattered clothes. They have no good food to eat. When they are sick, they have no money to buy medicines.

Therefore, we must help these unfortunate beggars. It is our duty to give them money and also food and clothes.

Usage of water

Do you know water is a valuable gift of nature. There is no world without water.

We can get water from rivers, lakes and streams. We need water for electricity. Water is needed to build factories, buildings and houses. Without water we

can't get any food.

We can live for a few days without food but we can't live without water. We need water for our daily activities, like washing, cooking, bathing, drinking etc.

Water is what nature gives us so we must use it

carefully. Without water people face a lot of problems in agriculture.

The world needs water at every second. But these days people waste water too much. Hereafter we must use it carefully.
