S - Lon Lanka (Pvt) Ltd, the market leader in water management systems in Sri Lanka is an operating company of The Capital Maharaja Organization Limited.

Whilst being the leader in the supply of piping systems for 54 years, S- Lon also has the distinctive honour of providing water management solutions to key water supply projects undertaken both locally and internationally. A major contributor to the building construction industry, S-Lon has also contributed immensely to the development of the telecom sector with its supply of telecom conduits to telecom companies.

To further strengthen "Team S- Lon" to meet the market demands we have immediate opportunities for

Production Engineer - Factory

▶ To act as a sectional head at the production shop floor in managing the plant to its effective efficiency in all the aspects looking at the critical KPIs of the throughput and also the optimum utilization in handling the related labour force and executing the production plan.

▶ Should have a BSc Degree in Production Engineering from a reputed University locally or overseas and should be willing to work long hours. Experience of 2-3 years is desirable but not a must. Must have the ability to manage a shift. Good communication skills and knowledge in IT is compulsory.

Shift Engineers - Factory

▶ To act as an operational figure at the shop floor in managing the plant to its effective efficiency in all the aspects maintaining the right conditions of the machine and also the optimum utilization of the related labour force and executing the production plan.

▶ Should have a BSc Degree in Production Engineering from a reputed University locally or overseas and should be willing to work long hours. Experience of 2-3 years is desirable but not a must. Must have the ability to manage a shift independently. Good communication skills and knowledge in IT is compulsory.

Electrical / Electronics Engineer & Mechanical Engineer - Factory

▶ To act as a department head of the related section of the plant & manage it to its effective efficiency in all the aspects maintaining the right conditions of the machine and also the optimum utilization / handling the related labour force and executing the production plan.

▶ The person should have a BSc Degree in Engineering (Mechanical / Electrical) from a reputed University locally or overseas and should be willing to work long hours. At the entry level, experience may not be a considerable fact but having two to three years' experience in related area will be an advantage. Must have the ability to manage the department independently. Good communication skills and knowledge in IT is compulsory.

Product Development Manager - Head Office

▶ To assist in the Product Development Process.

▶ BSc Degree in Civil Engineering with a minimum of 3 years of progressive experience. Technical background with experience in Water pumps and Adhesive range would be an added advantage. A proven track record in co-ordinating product development projects is a plus. Good written and verbal communication skills are essential. Should be an excellent team player and have the ability to influence cross-functional teams without formal authority.

Marketing Reps - Islandwide

▶ To represent the company in the assigned area and to handle the distributor point effectively, in accordance with the company guidelines.

▶ GCE O/L with 6 passes including Mathematics and English with more than two years experience in sales. Preference will be given to those who have experience in the hardware industry. Those without experience will be considered as "Trainee Marketing Representatives". Should possess effective communication skills and a valid motor-cycle riding license. Be willing to travel extensively and to work in any part of the country. Age below 30 years.

Quality Assurance Manager - Factory

▶ Responsible in maintaining and improving Quality Assurance Programmes run in S-lon. Not restricted to production, the candidate would also be involved in Quality Function Deployment and Statistical Techniques in different departments through inter-disciplinary collaboration with internal Business Units with a view of maintaining high customer satisfaction.

▶ MSc - Polymer / Chemical / Industrial Engineering Degree from a recognized University with 2 to 5 years' experience in the industry in a similar capacity. Sound knowledge of Statistical Process control, Six Sigma and 5 S. Good mix of knowledge in a wide spectrum of fields such as Chemical, Electrical and Mechanical Engineering. Computer Skills, including a general knowledge of data acquisition, database mining, statistical analysis and proficiency with spreadsheet and word processing programmes. Strong inter-personal and excellent communication skills are a must.

R & D Manager - Factory

▶ Responsible for new material and technology research and development. He/She would also be involved in different material R&D projects through inter-disciplinary collaboration with both internal Business Units and external Universities and Institutes.

▶ MSc - Polymer / Chemical Engineering Degree from a recognized University with 2 to 5 years experience in the Industry. A sound knowledge of formulation chemistry. Ability to compile data, draw sound conclusions, present results and make appropriate recommendations. Familiar with Quality Function Deployment, statistical techniques for collection of market information of most critical product characteristics and making Machinery selection, based on the same. Should have worked with modern analytical instruments. Computer skills, including a general knowledge of data acquisition, database manipulation, statistical analysis and proficiency with spreadsheet and word processing programmes. Strong inter-personal skills. Excellent communication skills, ability to interface one-on-one with customers and give presentations. Should have the ability to act in a decisive, urgent and committed fashion to support the business.

Brand Manager - Head Office

▶ Responsible for building brand equity of the company products/brands with the help of the cross-functional teams (which includes Sales & Finance).

▶ Bachelor's Degree in Marketing / CIM or an equivalent qualification from a recognized institute with a minimum 3 years of experience in Brand Management. Should possess good analytical skills. Be an excellent communicator both verbal and written - Sinhala and English. Competency in Tamil language would be an added advantage. Age below 30 years.

The ideal candidates should be dynamic and enthusiastic persons with a positive attitude and a passion for meeting new challenges with courage and determination. Fluency (reading and writing) in English and Sinhala is a must. Tamil would be an added advantage. Please note that all vacancies for factory is at Sandalanka. Please submit your resume together with contact details of two non-related referees within 7 days to:
